PRESS RELEASE

ODIHAM, Hampshire, UK – May 11th 2018

Spectro® | Jet-Care® announce relocation of its Swiss Laboratory

Spectro | Jet-Care, leaders in the provision of fluid and debris analysis services to the global aviation, industrial and marine markets since 1976, are delighted to announce the relocation of its Swiss laboratory at Rinaustrasse 452, Kaiseraugst to the nearby Landstrasse 23.

The new facility, just five minutes from the previous laboratory, has undergone extensive refurbishment more than doubling the size of the Swiss operation. The addition of new equipment has allowed expansion of the testing portfolio to match those available at the Spectro | Jet-Care laboratories in the UK and USA. The new site also provides increased office space as well as newly created customer areas, an improvement that further enables the Swiss team to focus on new opportunities in Central Europe. To this end Hans Czerwinski has joined the Spectro | Jet-Care team, as Business Development Manager, based out of Germany, and will be focusing on new business across this geographical region.

“The continued strong growth, in particular, of the aviation and industrial business, through our Swiss laboratory, has led to the move enabling us to treble the size of our previous laboratory space” said David Glass, Managing Director, Spectro Oil AG. “In addition the development of our UK and US facilities in recent years, and now the new Swiss facility, has allowed us to maintain our position as a first class, independent laboratory on a worldwide basis”.

Spectro | Jet-Care have been providing independent fluid and debris analysis services for over 42 years and by taking a tailored approach to each client, combined with the highest standard of customer service, are able to give an accurate assessment of oil life and early warning of any problems. In depth and precise analysis alongside technical guidance from experienced engineers and laboratory technicians allow customers to secure optimum maintenance cycles and avoid unplanned downtime. In addition all three laboratories maintain the same exacting high standards and are supported by the industry recognised accreditation, ISO/IEC 17025:2005, the testing and calibration laboratory standard.

Since the opening of a Swiss operation in 2000, and the development of the Spectro | Jet-Care UK and US facilities in recent years, the continued expansion overall has allowed the Company to maintain its position as a first class, independent laboratory providing comprehensive analysis services to customers around the world.
